

2013 Edition of the Cocoa of Excellence and the results of the International Cocoa Awards

The goal of the Cocoa of Excellence Programme is to promote high quality cocoa origins. The specific objectives are:

- To create awareness among producers and other operators in the national and international cocoa supply chain on the opportunities of high quality cocoa differentiation;
- To provide global recognition for the producers and “terroirs” of high quality cocoa origins;
- To expose chocolate manufacturers and experienced consumers to the spectrum of flavours that exist in cocoa from different origins,
- To facilitate linkages between producers of quality cocoa origins and manufacturers of specialty chocolate products; and
- To stimulate, through the institutionalization of the CoE event, the capacity of producing countries to search for, to evaluate and to produce specialty cocoa types.

A total of **121 samples were received from 24 countries** for the 2013 Edition. Of these, **50 high quality cocoa samples were selected**, representing the best flavour quality diversity and the geographic and genetic origins of samples and processed into chocolates. These chocolates were tasted blindly by a professional jury of 33 chocolatiers and sensory evaluation experts. From these 50 chocolate samples, **the following 15 International Cocoa Awards** were celebrated at the Salon du Chocolat in Paris on Wednesday 30 October.
